SUPERMASTER

Two Platen Advanced Series

The SUPERMASTER TP-Series is a revolutionary "ture" two-platen design from Chen Hsong. Designed in 3 years with a team led by leading European and Japanese industry experts, it represents a unique combination of world-class, no compromise performance and characteristic Chen Hsong affordability. Numerous innovations protected by international patents give this machine a price-performance value that is previously undreamt-of. Prepare to be blown away by the kind of wonders it can do to your operation - the possibilities are simply limitless...

① The Fastest Clamping Unit Available:
750mm/sec

Extremely fast clamp movements (8 seconds dry cycle for SM2200TP)
significantly shorten cycle time

② Patented tie-bar/hydraulic connection

Reduces stress concentration and greatly simplifies maintenance

③ Patented high-speed automatic
mould-height adjustment

Ensures accurate and fast operation

⑤ Patented inter-lock mechanism

Combines high speed and silent operation with extremely high
precision and rock-solid reliability

④ State-of-the-Art Injection Unit Design

Extra feeding temperature control zone
Tri-colinear bearings ensure perfect alignment
Nozzle tip can be moved beyond the fixed platen by up to 300mm
All screws have L/D ratio of 1:22 for optimal melt quality*

Images of products are for your reference and subject to change without notice

*19:1 to 20:1 alternatives are available

Insist on “True” Two-Platen Design

Shortest footprint - easy to fit into any factory

Largest opening stroke

Second Generation Servo-Drive System

saves up to 80% Electricity*

Driven by a revolutionary intelligent servo system,the second-generation SVP/2 power pack combines a fast-response gear pump with a high-precision servomotor, integrated with a proprietary servo-drive into an affordable package that guarantees the highest response, highest precision and lowest power consumption at the same time.

Energy Saving

Saves up to 80% of electricity compared to traditional fixed pump systems*

Ultimate Response

Response speed is more than double of a variable displacement pump

Ultimate Precision & Repeatability

Up to 0.5% repeatability even under extremely low speed & prolonged holding conditions

Long Operational Life

Low oil temperature conserves cooling water and reduces the need for hydraulic oil, thus extendingthe useable lives of hydraulic parts

Items	SVP/2	Servo Pump	All Electric	Variable Pump

Mix-and-Match with Unparalleled Flexibility

13 Clamping Units (from 700 to 6,500 tons) and
14 injection Units (Shot weight from 1,968 - 106,081 grams) for flexible mix-and-match.

14 Clamping Units (Clamping Force)	
	
1	700tons
2	850tons
3	1050tons
4	1250tons
5	1450tons
6	1650tons
7	1900tons
8	2200tons
9	2600tons
10	3000tons
11	3600tons
12	4500tons
13	6500tons

E	44,843g
F	61,166g
G	81,043g
H	106,081g

Exclusive Patented Circular Platen

- 1 Even stress distribution to moulds - improves production stability and part quality
- 2 More uniform stress distribution helps extend mould life
- 3 Enhanced stiffness and structural integrity makes this design suitable for all moulding applications

MPC 7.0 intelligent networkable computer controller

The MPC 7.0 is a high performance, new generation intelligent computer controller available exclusively from Chen Hsong. Designed in Japan and constructed with the latest SMT technology, it boasts full compatibility with JIS standards, enhanced stability and ultimate reliability. This controller comes standard with multi-lingual interfaces, built-in networking, advanced intelligent diagnostics, and the ability to retain data for over five years without external power. Includes full networking support for industrie 4.0.
